

Daniels and Worthinghams Muscle Testing: Techniques of Manual Examination

This edition of the text provides the information necessary to evaluate muscular weakness, and to determine the limited ranges of motion. It covers the anatomical information and muscle tests for each body region, including positions, stabilization, testing procedures, precautions and special considerations. New to this edition is muscle testing of Bulbar (head, face, and neck), breathing problems, upright motor controls, and comprehensive review of functional anatomy and innervation.
