

Astrological Psychology, Western Esotericism, and the Transpersonal

The astrological psychology of Swiss pioneers Bruno & Louise Huber is now widely known and well documented in the English language. In this book, Sue Lewis examines the subject over a broad canvas, encompassing esotericism, astrology, psychology, philosophy and even the frontiers of modern science. In the process she shows the Hubers as part of a living stream in the development of human ideas, indeed at the leading edge of their time. Sue is well qualified for the task, from her long interest in astrology and astrological symbolism, her involvement in the world of astrological psychology and her more recent Masters degree in Western Esotericism. The result is a comprehensively referenced work that will be of use to future scholars. It is also a readable text giving an overview of where astrological psychology fits in to its wider context. Sue writes as both seeker and scholar and in part of the book she courageously shows how astrological psychology has helped in her own process of development.
