

# Hierarchy of Needs: A Theory of Human Motivation

When Abraham H. Maslow introduced the world to Humanistic Theory, a third force in psychology was born (Behaviorism & Psychoanalytical theory being the first and second). As the name suggests, humanistic theory concerns itself with characteristics which are distinctly human. Arguably the best known example of such a characteristic is Self-Actualization, an innate motivating force unique to the human species. It was in this landmark publication that Maslow provided the first published representation of Self-Actualization at the pinnacle of a hierarchy of human needs. According to Maslow Self-Actualization refers to the desire for self-fulfillment, in essence to become everything that one is capable of becoming. This classic publication is essential reading for psychology students, educators and professionals. Hierarchy of Needs: A Theory of Human Motivation (Kindle Edition) forms part of an initiative to make important, insightful and engaging psychology publications widely available.
