

Multidisciplinary Management Of Migraine: Pharmacological, Manual, and Other Therapies (Contemporary Issues in Physical Therapy and Rehabilitation M)

Another selection of the Jones and Bartlett Series: Contemporary Issues in Physical Therapy and Rehabilitation Medicine. *Multidisciplinary Management of Migraine: Pharmacological, Manual, and Other Therapies* is the first textbook focused on the multidisciplinary treatment of migraine including pharmacological and non-pharmacological approaches. This comprehensive text discusses epidemiology, pathophysiology, diagnosis, and management of patients with migraine headache integrating clinical experience and expertise with current evidence-based best practices. The authors are worldwide experts recognized in migraine and headache with experience in academic, research, and practice settings. *Multidisciplinary Management of Migraine: Pharmacological, Manual, and Other Therapies* reviews the options for medical management of patients with migraine by way of: pharmacological interventions; musculoskeletal interventions including muscle and joint-centered interventions, manual therapy, and dry needling; and complementary and alternative medicine techniques including naturopathy, acupuncture, and placebo. With a multimodal and multidisciplinary approach, this comprehensive resource provides a variety of therapeutic tools for students and practitioners to provide excellent care and medical management of patients with migraine headache. Key Topics: Theories of migraine pathophysiology

Sensitization mechanisms
Migraine triggers
Examination of the cervical and thoracic spinal joints
Pharmacological interventions
Musculoskeletal interventions
Alternative medicine techniques
This textbook is perfect for completing a headache library combined with tension-type and cervicogenic headache. Browse additional titles in the Jones & Bartlett Learning Series Contemporary Issues in Physical Therapy and Rehabilitation Medicine, at: <http://go.jblearning.com/PTseries>
