

We Philologists (Friedrich Wilhelm Nietzsche)

We Philologists - Friedrich Wilhelm Nietzsche - Translated By J. M. Kennedy - The subject of education was one to which Nietzsche, especially during his residence in Basel, paid considerable attention, and his insight into it was very much deeper than that of, say, Herbert Spencer or even Johann Friedrich Herbart, the latter of whom has in late years exercised considerable influence in scholastic circles. Nietzsche clearly saw that the philologists (using the word chiefly in reference to the teachers of the classics in German colleges and universities) were absolutely unfitted for their high task, since they were one and all incapable of entering into the spirit of antiquity. Although at the first reading, therefore, this book may seem to be rather fragmentary, there are two main lines of thought running through it: an incisive criticism of German professors, and a number of constructive ideas as to what classical culture really should be. These scattered aphorisms, indeed, are significant as showing how far Nietzsche had travelled along the road over which humanity had been travelling from remote ages, and how greatly he was imbued with the pagan spirit which he recognised in Goethe and valued in Burckhardt. Even at this early period of his life Nietzsche was convinced that Christianity was the real danger to culture; and not merely modern Christianity, but also the Alexandrian culture, the last gasp of Greek antiquity, which had helped to bring Christianity about. When, in the

later aphorisms of We Philologists, Nietzsche appears to be throwing over the Greeks, it should be remembered that he does not refer to the Greeks of the era of Homer or Aeschylus, or even of Aristotle, but to the much later Greeks of the era of Longinus.
