

# CoCreating the Field: Intention and Practice in the Age of Complexity (Evolution of Gestalt)

Cocreating the Field is about developing a radically new story to shift our perception of who we are as humans from a focus on our separate individual natures to our complex interconnectedness. The core Gestalt model offers a theoretical and pragmatic frame for addressing urgent concerns in a wide range of crucial arenas. Topics include the new relational neuroscience and how it interfaces with Gestalts assumptions about healthy human process; how one therapist is working with children in Dharamsala, India and Capetown, South Africa to help them digitally tell their stories in support of resilience; how transformational thinking brings pro-social and, for some, spiritual questing into focus; and how Gestalt-trained practitioners, therapists, coaches and consultants can become citizen-practitioners in a troubled world. Going beyond the original Esalen Institute study conference on the Evolution of Gestalt, Cocreating the Field offers guidance for moving forward effectively and joyously as awakened interdependent participants in these stressful times.
