

# A.D.A.M.(R) Interactive Physiology CD: Nervous System II

Co-developed by Benjamin/Cummings Publishing and adam.com(R), the Interactive Physiology series software significantly enriches the teaching environment by providing visual understanding of complex topics. For use as both a presentation and teaching tool in the classroom, as well as a study tool for students, these CD-ROMs feature four color animations, sound, video, and extensive interactive quizzes that thoroughly explain difficult physiology concepts, many of which occur at the cellular and molecular level. The Nervous System II CD-ROM uses detailed illustrations at both gross and cellular levels to demonstrate the structure and function of the nervous system. This second CD on the nervous system focuses on synaptic potentials and transmission.
